ANIRUDDH KUMAR NAGAR

Data Analyst | Reporting & Business Intelligence
Pitampura, Delhi | +91-8920876766 | aniruddh155@gmail.com

PROFESSIONAL SUMMARY

Data analyst with a Computer Science Engineering degree and hands-on experience in KPI tracking, data quality auditing, and stakeholder reporting. Built a Power BI sales dashboard that turns raw data into a single reporting view, and evaluated Amazon Nova Act agent runs across 100+ evaluation cycles against defined quality benchmarks. Skilled in Power BI, Excel, Python, and SQL, with a record of turning ambiguous requirements into repeatable, documented, data-driven processes.

TECHNICAL SKILLS

BI & Reporting: Power BI, Microsoft Excel, Dashboard Development, KPI Tracking, Stakeholder Reporting
Programming & Data: Python, SQL, Data Analysis, Data Validation, Data Cleaning
Analytics & Governance: Quality Benchmarking, Trend & Anomaly Detection, Audit & Compliance Checks, Process Documentation
AI Evaluation: Prompt Engineering, Chain-of-Thought (CoT) Design, LLM Output Evaluation

PROFESSIONAL EXPERIENCE

Research Associate – AI: Keywords Studios **Nov 2025 – Jul 2026**

- Reviewed 50 Amazon Nova Act agent runs per day across 100+ evaluation cycles, tracking output-quality KPIs and standardizing the review workflow for a consistent, repeatable view of performance.
- Judged each run against structured quality benchmarks, identified failure trends and anomalies, and delivered feedback reports with corrected workflows that directly informed retraining decisions.
- Authored Chain-of-Thought (CoT) reasoning for failed runs to strengthen multi-step reasoning and reduce logical errors in generated outputs.
- Developed and refined prompts across multiple use cases to improve contextual accuracy, and documented findings for cross-team visibility.

Freelance Content Editor & Writer: YOOF **2024 – 2025**

- Researched, wrote, and edited 50+ articles for online publication, maintaining a consistent editorial voice on a monthly publishing schedule.
- Fact-checked content for accuracy and clarity ahead of publishing deadlines, working with editorial team members to maintain quality.

PROJECTS

- **Sales Dashboard (Power BI):** Built an interactive dashboard on a 1,000+ record Kaggle sales dataset with 7 visuals (total-sales KPI, ship mode, region, country map, sub-category, customer table, yearly sales vs profit) and a product slicer. Surfaced that the Central region drives ~56% of total sales.
- **SQL Sales Analysis (SQL, SQLite, Python):** Designed a 4-table relational schema on a synthetic retail dataset (4,850 orders) and wrote 8 queries using joins, CTEs, and window functions (LAG, RANK, moving averages), plus data-quality checks for duplicates, NULLs, and orphan keys.
- **AI Prompt Optimization System (Python, LLM APIs):** Built a framework to test and score prompt variants through structured evaluation loops, improving task success rate.
- **Machine Learning Projects (Python):** Handwriting recognition with a CNN on MNIST (89% test accuracy); human activity classification from smartphone sensor data (92% accuracy).
- **Suicide Prevention Website:** Built a resource and early-intervention web platform with a support-resource database, connecting at-risk users to helplines and counseling services.

EDUCATION

Bachelor of Engineering: Computer Science, Chandigarh University **2021 – 2025**

Intermediate (Class XII), Ramjas School **2020 – 2021**
